

Experiment 7: cd, cp, and ls Commands in Kali Linux

AIM

To execute and display the results of the following commands in the Kali Linux operating system:

- cd command
- cp command
- ls command

PROCEDURE

1. Open **Kali Linux**.
2. Open the **Terminal**.
3. Use the pwd command to check the current directory.
4. Use the cd command to change from one directory to another.
5. Create a sample file using the touch command.
6. Use the cp command to copy the file.
7. Use the ls command to display the files and directories.
8. Observe and record the output.

CODE / COMMANDS

i) cd Command

Purpose

The cd command stands for **Change Directory**. It is used to move from one directory to another.

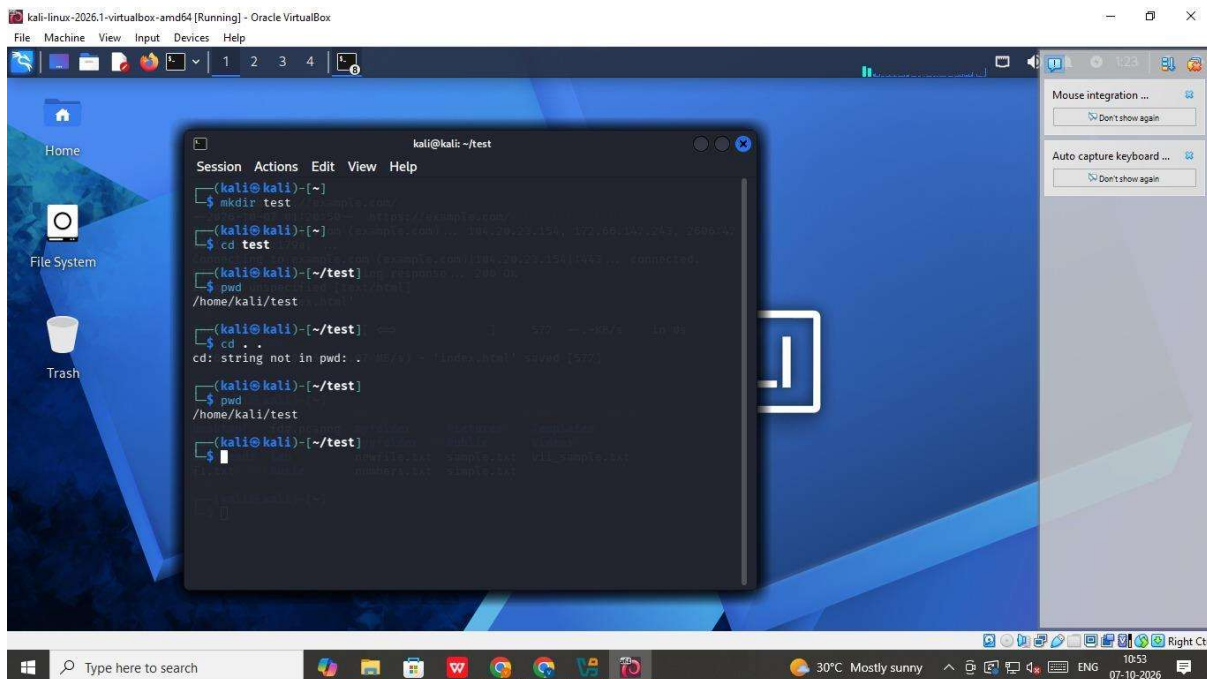

Command

```
mkdir test  
cd test  
pwd
```

Sample Input

```
mkdir test  
cd test  
pwd
```

Sample Output

The screenshot shows a Kali Linux desktop environment with a terminal window open. The terminal window title is 'kali@kali: ~/test'. The terminal output shows the following commands and their results:

```
kali@kali:~$ mkdir test  
kali@kali:~$ cd test  
kali@kali:~/test$ pwd  
/home/kali/test
```

The terminal window also shows a list of files in the current directory:

```
ls  
example1.txt  example2.txt  example3.txt  example4.txt  example5.txt  example6.txt  example7.txt  example8.txt  example9.txt  example10.txt
```

ii) cp Command

Purpose

The cp command is used to **copy files or directories**.

Command

First create a file:

```
touch original.txt
```

Copy the file:

```
cp original.txt copy.txt
```

Verify the files:

```
ls
```

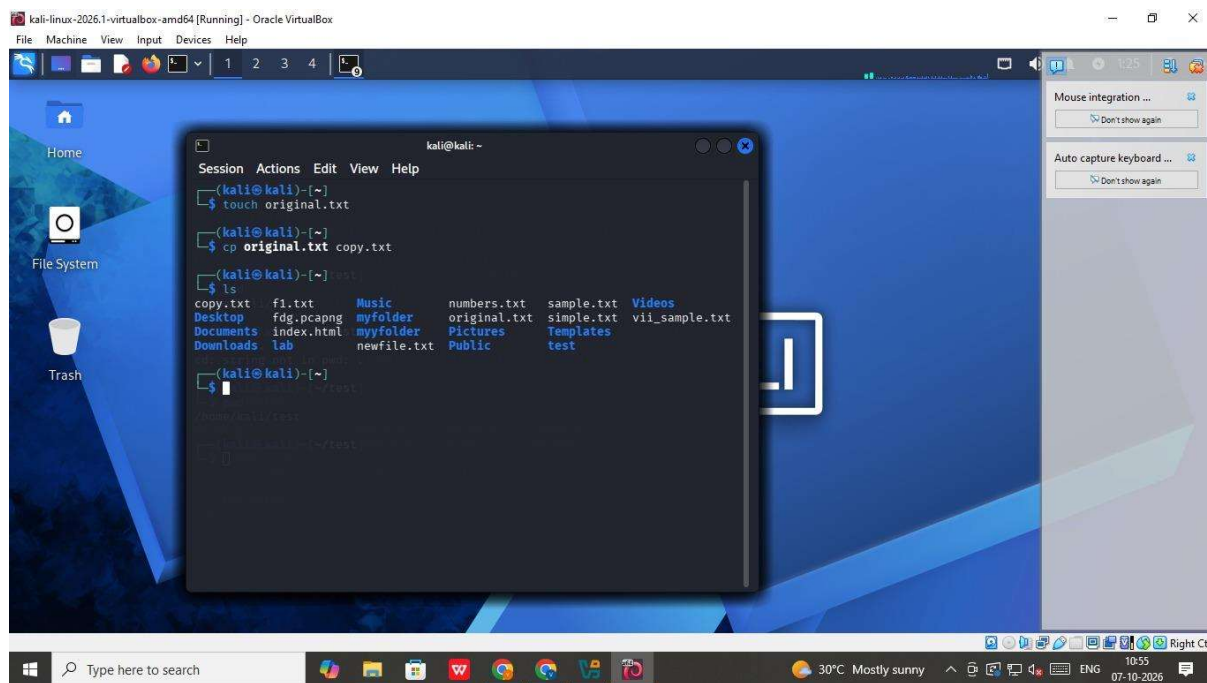

Sample Input

```
touch original.txt
```

```
cp original.txt copy.txt
```

```
ls
```

Sample Output

A screenshot of a Kali Linux virtual machine running in Oracle VM VirtualBox. The terminal window is open, showing the following commands and output:

```
kali@kali: ~  
$ touch original.txt  
$ cp original.txt copy.txt  
$ ls  
copy.txt  f1.txt  Music  numbers.txt  sample.txt  Videos  
Desktop  fdg.pcapng  myfolder  original.txt  simple.txt  vii_sample.txt  
Documents  index.html  myyfolder  Pictures  Templates  
Downloads  lab  newfile.txt  Public  test
```

The terminal window is titled "kali@kali: ~". The background of the virtual machine desktop is blue with a geometric pattern. The taskbar at the bottom shows various application icons and system status information including temperature (30°C), weather (Mostly sunny), and time (10:55, 07-10-2026).

iii) ls Command

Purpose

The **ls** command is used to **list files and directories** in the current directory.

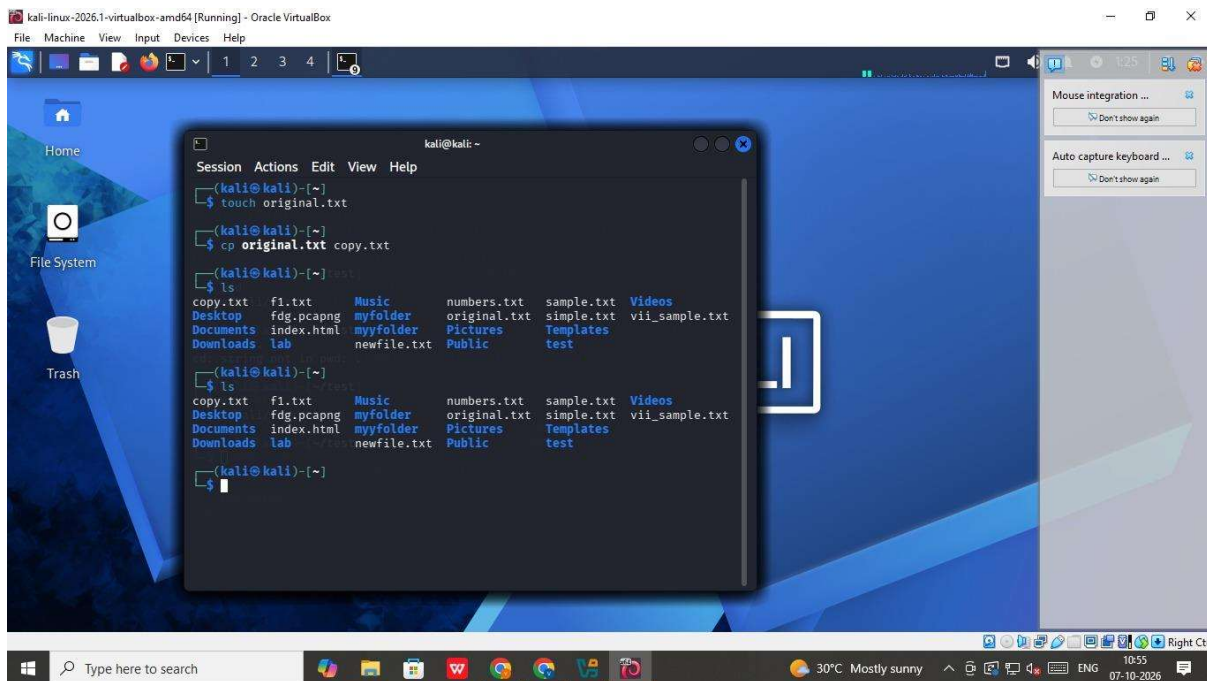

Command

ls

Sample Input

ls

Sample Output

The screenshot shows a Kali Linux desktop environment with a terminal window open. The terminal displays the following commands and their outputs:

```
kali@kali: ~  
$ touch original.txt  
$ cp original.txt copy.txt  
$ ls  
copy.txt  f1.txt  Music  numbers.txt  sample.txt  Videos  
Desktop  fdg.pcapng  myfolder  original.txt  simple.txt  vii_sample.txt  
Documents  index.html  myyfolder  Pictures  Templates  
Downloads  lab  newfile.txt  Public  test
```

4. RESULT

The following commands were successfully executed in **Kali Linux**:

Command	Purpose
cd	Changes the current directory
cp	Copies files or directories
ls	Lists files and directories

Result: The cd, cp, and ls commands were successfully executed and their outputs were verified in Kali Linux.
